

For students studying Maths, Further Maths and Financial Studies, view the link below to access six fantastic taster sessions from the Advanced Maths Support Programme, which will give you an idea of what to expect on a Level 3 course.

You may already be familiar with some of the concepts and techniques mentioned in the sessions, or they may introduce you to them ahead of you starting at college.

Either way, we hope you will find them interesting, and fun!

Each session has a short video, followed by an activity. You can complete the activities by signing in with Google, Desmos or by continuing without signing in.

Once you have watched the video for the section, click on the link to start the activity, then click 'Next' at the top right of the page to progress through the activity.
